

Summary of 10th Korea-Japan Joint Seminar on Space Environment Utilization Research

September 12 – 13, 2013

Korea University

145 Anam-ro Seongbuk-gu, Seoul, Korea,

1. Prof. Soo-Won Chae, Dean of College of Engineering, Korea University, delivered opening/ welcome address and encouraged the activity of this seminar. Participants appreciated the contributions of KARI and Korea University in hosting this seminar.
2. The Seminar this year celebrates the 10th anniversary since 2004. The chairs, Prof. Chi-Hwan Lee from Inha University and emeritus professor Makoto Asashima from University of Tokyo, delivered talks on perspective of the seminar and microgravity research.
3. Reports on science perspective from two science communities, as well as the updates of space programs seem appropriate, and they saw the substantial progress.
4. All the participants feel comfortable to learn that the progress of space programs in two countries looks substantial, and to recognize that the science communities and space agencies personnel had proper time to exchange views, ideas, plans and opinions on the materials presented.
5. The both parties propose to summarize the decade of Seminar activities. The archive under consideration is intended to be a brief document for the general public, explaining the progress, achievements, lessons learned and the recommendation for the future activities.
6. It was agreed to continue this seminar, as it is the next one will be hosted by JAXA and Japanese science community in Japan. (The site/data TBD)

7. Number of attendees

Categories of Reports	Korea	Japan
Opening and Welcome	1	N/A
Seminar Perspective	1	1
Space Program Introduction	1	1

Life Science, Molecular Biology & Biomedical Science (I)	3	3
Life Science, Molecular Biology & Biomedical Science (II)	2	4
Material and Combustion Science & Others	3	5
General		1
Seminar' First Decade History		1
Presenters	11	16
Researchers	10	
Students	30	1
Attendees total number	51	17
